DETAILED ACTION

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 19-27 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 6-14 does not produce a useful, concrete and tangible result. For example, there is no storing, displaying or conveying data to a user. No art has been applied to these claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15-17 is rejected under 35 U.S.C. 102(b) as being anticipated by Epstein (US 4113381). No weight is given to the limitations of the preamble because the preamble recites intended use. Given the broadest reasonable interpretation, in reference to claim 1, Epstein teach a central unit (100), at least one measurement module (90) is connected to said central unit, a selection line assigned to each measurement module; wherein: each measurement module is selectable by said central unit by a selection line. Note column 12, lines 49-52 and Fig. 2.

Art Unit: 2863

In reference to claim 16, Epstein teach all measurement modules are connectable with the central unit over a control transmission line. Note Figure 2.

In reference to claim 17, Epstein teach each measurement module has a module transmission line. Note Figure 2, (lines leading to modules 75 and 90).

Claim Objections

Claim 18 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
